

SCS 2680 – iOS Mobile Application Development

Assignment #1 – Contact Entry App

Instructions

Create a Single View Application that will allow the User to enter a New Contact.

1. The view will be used to create a new contact.
 - At the top display the title of the view and two buttons:
 - Title: "New Contact"
 - Left Button: "Cancel"
 - Right Button: "Save"
 - The form for entering a contact:
 - First Name
 - Last Name
 - Company
 - Phone
 - Email
2. When the User taps the "Cancel" button.
 - Display an action sheet that says, "Are you sure?" with two options:
 - "No Way!"
 - Close the action sheet.
 - "Yes, I'm Sure!"
 - Set all the text fields to blank.
3. When the User taps the "Save".
 - Display an alert that says:
 - Title: "New Contact Saved"
 - Message: <First Name> is now a contact.
 - Button: OK
 - Set all the text fields to blank.
4. Error Checking.
 - When the User taps "Save" with an empty text field
 - Display an appropriate alert
 - Do not delete any content
